TEACHER'S ASSISTANT at International Islamic University Chittagong, <i>Computer Programming 1 Lab Computer Programming 2 Lab Competitive Programming 1 Competitive Programming 2</i>	
Mentor and Trainer of IIUC female competitive programming boot-camp	

Skill

C/C++, JavaScript, Basic Python | HTML, CSS, React.js, DaisyUI, Material UI | Node.js, NestJS, Express.js, GraphQL, REST API, Basic Django, Flask | MySQL, MongoDB, SQLite, Firebase | Linux Server Management, Nginx, Docker, CI/CD, Rsync, PM2, Environment Variables, KVM Virtualization (ExonHost VPS, Hosting) | Git, GitHub | Data Structures & Algorithms

Projects

Emventory - SAAS, mPair Technologies Ltd. - About: Emventory is a scalable multi-tenant SaaS platform designed to help businesses manage inventory, sales, and ecommerce operations in a unified system. The platform supports product management, inventory tracking, order processing, POS operations, and customer loyalty features for organizations with multiple stores. I primarily worked on backend development and server infrastructure, building high-performance APIs using Node.js , NestJS , and GraphQL with optimized MySQL queries.	2025/01 – Present
Shayoni's Emporium 🌐, mPair Technologies Ltd. - About: It's a full-stack eCommerce platform that includes both a customer-facing website and an admin panel. The system allows users to browse products, filter by categories, add items to cart, and place orders, while the admin dashboard provides full control over product management, category hierarchy, inventory, and order processing. It supports advanced features such as product variations, discounts, and a complete checkout flow. The backend is built using Node.js, Express.js, Prisma and MongoDB, and the application is deployed on a cPanel-based VPS server.	

G4 International © , mPair Technologies Ltd.

- **About:** G4 International is a POS (Point of Sale) based system designed to manage sales, inventory, and daily business operations efficiently. It supports product and stock management, sales processing, invoice generation, and customer handling. The system includes features like product variations, discounts, and real-time sales tracking to streamline retail operations. Built with a scalable backend using Node.js, Express.js, Prisma, and MySQL, the application is deployed on a cPanel-based VPS server.

- **Codeforces:** Mariya_S.F. | Max. pupil, 1244 | Contest participation: 170+ | Problem solved: 950+
 - **Atcoder:** Mariya_SF | Contest participation: 50+
 - **LeetCode:** Mariya_SF | Problem solved: 100+
- Overall, 1000+ problems were solved on different Online Judges

Contest Participants [Team: IIUC_Return_To_Sleep]

National Girls' Programming Contest-2021 | Organized by DIU CPC
Ada Lovelace National Girls' Programming Contest 2021| Organized by BdOSN
EDU Inter-University Engineering Day 2022 | Organized by EDU IUPC
CCE Inter-Department Programming Contest 2022 | Organized by CCE Club, IIUC
Intra-University Programming Contest 2023 | Organized by IIUCPS, IIUC
Inter University Programming Contest (Divisional) | Organized by CUET CSE Fest 2022

Performance

- **BEST PERFORMER** - IIUC Competitive Programming Bootcamp | AU'21(Beginner Level) | SP'22(Intermediate Level)
- **PROBLEM SETTER** - IIUC Powerpuff Girls Programming Contest 2022
